

Dominique Chin-Jones

5901 Montrose Rd, North Bethesda, MD 20852 | 571-246-2809 | domecj13@gmail.com

[Github](#) | [Portfolio](#) | [LinkedIn](#)

Creative, detail-oriented software engineer that is dedicated to quality work. Proven track record of creating and implementing successful full stack applications.

SKILLS

Proficient: JavaScript, Node.js, Python, ReactJS, MySQL, REST APIs, Docker, Git VCS, HTML, CSS

Familiar: Java, Next.js, Django, Flask, Linux, non-relational databases

EXPERIENCE

100Devs (Washington, D.C) – *Software Engineer* | January 2022 - Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
 - Built semantically structured and scalable full stack web applications with modern technologies
 - Applied agile methodologies such as Scrum for project management
-

PROJECTS

E-Commerce Cart - [Github](#) | [Demo](#)

Technologies: ReactJS Library, TypeScript/TSX, HTML/CSS, Vite

- Single page Web application utilizing React Router and localStorage
- Scalable and type safe with context, custom hooks and state management
- Simple UI to create a cart, view individual prices, and clear the entire cart

ClearSky - [Github](#) | [Demo](#)

Technologies: ReactJS Library, JavaScript/JCX, HTML/CSS, Vite

- Web application utilizing the OpenWeather API
- Built, bundled, and minified with Vite
- Search by city with instant metric updates on request

Task Tracker - [Github](#) | [Demo](#)

Technologies: ReactJS Library, JavaScript/JCX, HTML/CSS

- Web application created with ReactJS
- CRUD to-list with custom CSS styling
- Mark added tasks as “complete”, edit tasks, and delete tasks from the list
- Fully modular React components to pass from one project to another
