

Dominique Chin-Jones

Astoria, NY 11106 | 240-760-8968 | domecj13@gmail.com | [GitHub](#) | [LinkedIn](#)

Full-stack engineer with 5+ years of experience in web development, specializing in AI solutions, JavaScript, TypeScript, PostgreSQL and scalable cloud infrastructure.

PROFESSIONAL EXPERIENCE

AlterMe (Remote - New York, NY) – **Senior Software Engineer** | March 2025 - Present

- Designed and deployed a RAG-based AI customer support system leveraging Genkit and Gemini, significantly improving chatbot response accuracy and relevance
- Built and integrated AI-driven image generation for meals and recipes leveraging Gemini 2 Flash, enriching the end-user experience and reducing manual content creation
- Architected a queue-based, routine notification system through SQS-triggered Lambda functions and EventBridge cron scheduling increasing app engagement by 30% and user retention by 23%
- Deployed and configured Snowflake Openflow to orchestrate secure, near-real-time data ingestion from PostgreSQL into Snowflake, enabling downstream analytics and reporting
- Built a real-time data pipeline linking Shopify, Salesforce, UPS, and Braze; streamlining cross-platform transactions and data analytics

Rapptr Labs (Remote - New York, NY) – **Backend Engineer** | Feb 2023 - March 2025

Product Contributions

[AlterMe - Fitness and health based multi-platform app](#)

[ShoBizzy - Cloud-native social networking and production/show business app](#)

- Led full-stack development and implemented a candidate search algorithm leading to a 70% improvement in matches

[Moonlite - Storybook projector companion app](#)

- Maintained and optimized AWS infrastructure, reducing cloud costs by 13% YoY across RDS, CloudWatch, EC2, and Lambda services

Leadership Experience

- Accelerated new hire productivity by 40% through structured onboarding and code reviews

AWARDS AND CERTIFICATIONS

E-commerce and Integrations Engineering Lead, AlterMe (2025)

Integration Engineering Lead, Rapptr Labs (2024)

MVP & Maintenance Team Solutions Lead, Rapptr Labs (2023)

SKILLS

Languages: JavaScript, TypeScript, Python, Rust, SQL, HTML/CSS, Java

Frameworks & Libraries: Node.js, Express, Prisma, Django, Flask, React, Next.js, Tailwind, Spring

AI & LLMs: RAG, prompt engineering, embeddings, multimodal generation

AI Tooling: Genkit, OpenAI APIs, model orchestration

Data: Snowflake, pgvector, vector search, hybrid retrieval

Cloud & DevOps: AWS (Lambda, RDS, S3, CloudWatch, EventBridge), Docker, Kubernetes, Terraform

Databases & Tooling: PostgreSQL, MySQL, Redis, Git, CI/CD

Technology Partners: Salesforce, Shopify, Twilio, Segment, Sentry, New Relic, OneSignal
